

THE DUTY ON WHITE PINE.

VIGOROUS ATTACK ON THE PROPOSED \$5 PER THOUSAND TAX.

Mr. Vest says it is the most... The question of putting a duty of \$2 a thousand feet on white pine lumber led to a long debate in the Senate today, and finally went over without action. One of the Democratic Senators, Mr. Bacon of Georgia, put himself firmly on the side of the Republic, and argued in favor of it. He said that the average rate of duty in the wood schedule was less than 20 per cent. ad valorem, that it was a revenue duty, and that it would operate to the benefit of the lumber industry of Georgia. His colleague, Mr. Clay, made a long prepared speech in which he stated that the Republic had no right to protect its system generally, but without stating his views especially on the white pine question.

The Alvirre Senator from South Dakota, Mr. Pettigrew, made as bitter a speech against the paragraph as Mr. Vest had made earlier in the day, and warned the Republicans that a duty of \$2 a thousand feet on white pine lumber would be a toll and tribute levied on the people of the prairie States for the benefit of the lumber people, would result in the defeat of the Republican party in the next election. He did not conclude his argument, but intends to continue it when the paragraph comes up again. Expecting to come on Monday and Tuesday, he asked that the question be kept open till his return, but his request was objected to by Mr. Hale (Rep., Me.).

Vice-President Hobart laid before the Senate this morning a communication from the Secretary of State, with a protest from the Austrian-Hungarian Government against the discrimination on the part of the United States against the right of the "most favored nation" guaranteed by treaty. The communication was laid on the table.

The tariff bill was taken up at a quarter past 12; the question being on paragraph 192, making a duty on sugar, brown, aided, or squared, 5 cents per cubic foot. The paragraph was agreed to.

Mr. Vest (Dem., Ark.) gave notice that as to that and other paragraphs in the wood schedule he would, at the proper time, move to place the articles in them on the free list. He also criticized the paragraph 193 adding an export duty to the duties on sugar, and moved to strike the same.

The committee amendments to that paragraph were all agreed to.

Mr. Jones (Dem., Ark.) opposed the duty on sugar (paragraph 193) as a heavy tax upon the people in the Northwest and the prairie States. They are a hard enough task, he said, in providing shelter for the people, and he allowed to buy lumber as cheaply as possible without a tax.

Mr. Vest said that in his judgment, there was not a single item in the bill so utterly indefensible as the item taking white pine from the free list and putting on it a duty of \$2 a thousand feet. He called the tariff on white pine the most indefensible of the confederous woods. It was as superior to the spruce and yellow pitch pine of the South as mahogany was to the softest wood. Spruce, which was the peculiar product of Maine, had always had a duty of \$2 a thousand, while white pine had none. He said that the tariff on white pine was a great extent in Maine, had a duty of only \$1 a thousand under the McKinley act and a duty of \$2 a thousand under the present tariff.

Mr. Vest said, in a compromise to the Congress, that it was a notorious fact that this whole tariff schedule was made for the purpose of necessity of life in the interest of the lumber industry, and that it was a matter of millions at the expense of the consumer.

Mr. Bacon (Dem., Ga.) took exception to Mr. Vest's statement as to the lumber items being the most indefensible items in the bill. He (Mr. Bacon) said that the schedule was made for the purpose of necessity of life in the interest of the lumber industry, and that it was a matter of millions at the expense of the consumer.

Mr. Burrows (Rep., Mich.) said that the average rate of duty in the wood schedule was less than 17 per cent.

Mr. Bacon went on to say that he was not a tariff man, but he was in favor of a revenue tariff system. But he was in favor of a revenue tariff system. But he was in favor of a revenue tariff system. But he was in favor of a revenue tariff system.

Mr. Vest expressed his surprise at Mr. Bacon's remarks, saying that one of the duties of a Senator was to protect the people from the tariff. He said that the tariff was a matter of millions at the expense of the consumer.

Mr. Bacon replied that it was contrary to all precedent to say that a duty of \$2 a thousand feet on white pine was a tariff. He said that the tariff was a matter of millions at the expense of the consumer.

Mr. Vest said that he was in favor of a revenue tariff system. But he was in favor of a revenue tariff system. But he was in favor of a revenue tariff system. But he was in favor of a revenue tariff system.

Mr. Vest said that he was in favor of a revenue tariff system. But he was in favor of a revenue tariff system. But he was in favor of a revenue tariff system. But he was in favor of a revenue tariff system.

WHALES AT THE AQUARIUM.

TWO YOUNG ONES FROM THE ST. LAWRENCE GULF BROUGHT IN.

New York has had various experiences with Dead Cetaceans, but these are the first live specimens seen here for twenty-five years. They will be seen at the Aquarium. Not for many years has there been a live whale within the limits of this city. Occasionally, cetaceans as near here as the Long Island coast, whereupon the inhabitants of the nearest village turn out to welcome it with open arms, harpoons, boat hooks, pitchforks, spears, and axes, and if their luck is better than the whale's they eventually turn that two venturous cetacean into oil and bones. Three live whales, which were dead whales here, notably one that for a period last year dwelt in body on an East River pier, but its spirit wandered far and wide upon the wings of the wind, whereupon the Health Board held a meeting and their noses simultaneously passed resolutions, in consequence of which the remains of the whale remained no longer. Since then New York has had no whales alive or dead until yesterday morning.

Two of them arrived then, and are now safely quartered in the big 38-foot tank of the Aquarium. They are very much alive at present, and the Aquarium people hope and expect that they will remain so for many months, at least. They are likely to have developed land sickness from their long journey across the country, as they came by rail. One, the larger of the two, is a female. She is of cream-white color, is about 10½ feet long, and weighs probably 800 pounds. Her companion, a male, is 9 feet long, weighs perhaps 600 pounds, and is of a darker color. Both are beluga or white whales, their scientific name being *Beluga borealis*, a species common along the Atlantic coast north of here. They are not the first of the species brought alive to this city, but as far as the people at the Aquarium can tell they are the only ones brought here in twenty-five years.

The young ones were designed provisions were made for a large central tank big enough to accommodate a whale should the city be able to acquire one. Since the completion of the building Dr. Bean, the Superintendent, has been looking out for a chance to get one of these cetaceans, and for an arrangement was made with Prof. H. D. Butler of New York, who is expert on cetaceans to provide two specimens. Prof. Butler went to Riviere Ouelle on the south shore of the St. Lawrence River, just at the mouth of the Gulf, where he knew that the white whales come in after sardines and herring, and made arrangements with the railroad to transport the whales to New York.

There was a small party of about twenty people who went to Riviere Ouelle to see the whales. They were met by Prof. Butler, who showed them the whales and explained their habits. The whales were very tame and allowed themselves to be touched and petted. They were very much interested in the people, and the people were very much interested in the whales.

SECOND BATTERY IN CAMP.

The Artillerymen Go to Van Cortlandt Park for Their Annual Inspection.

Second Battery, N. G. N. Y., went into camp yesterday at Van Cortlandt Park, preparatory to the annual inspection and muster. They will remain in camp until Monday, when the inspection will take place. Two troops, comprising six officers and sixty men, in command of Capt. David Wilson, left the armory at Thirty-third street and Park avenue shortly after 10 o'clock and marched west to Madison avenue and then turned north. The march to the camping ground occupied a little over four hours. When the soldiers arrived three ball games were in progress, the tennis courts were crowded, a band was in the midst of a concert, and hundreds of bicyclists were riding over the grass.

The bare of the artillerymen's trumpets stopped everything. The umpires of the ball games called time; the girls deserted the tennis courts and the band stand, and at least a thousand spectators rushed to the park entrance to meet the soldiers. The four sections, each comprising a gun, a caisson, and nine cannoniers, moved in the morning to get the camp ready. The picket line was staked out, the tents pitched, and the pots and kettles for the evening meal were ready. Three hours and a half after the arrival the horses were unhitched and tied and every one was ready for supper.

At 8:30 o'clock this morning there will be a drill. At 10 o'clock and 11 o'clock, respectively, Gen. Howard Carroll, Chief of Artillery, will review the battery. The Old Guard will be in attendance every way to the morning morning drill. Gen. E. M. Hoffman, Inspector-General N. G. N. Y., will hold his inspection of the battery at 11 o'clock. The soldiers and those who did not go into camp yesterday will arrive today.

The battery of the artillerymen's trumpets stopped everything. The umpires of the ball games called time; the girls deserted the tennis courts and the band stand, and at least a thousand spectators rushed to the park entrance to meet the soldiers. Three hours and a half after the arrival the horses were unhitched and tied and every one was ready for supper.

The battery of the artillerymen's trumpets stopped everything. The umpires of the ball games called time; the girls deserted the tennis courts and the band stand, and at least a thousand spectators rushed to the park entrance to meet the soldiers. The four sections, each comprising a gun, a caisson, and nine cannoniers, moved in the morning to get the camp ready. The picket line was staked out, the tents pitched, and the pots and kettles for the evening meal were ready. Three hours and a half after the arrival the horses were unhitched and tied and every one was ready for supper.

THOSE NEWTOWN BONDS.

ISSUED TO MAKE THE BIG CITY PAY FOR LOCAL IMPROVEMENTS.

New Comes a Question Whether They Are Legal After All—There Was a Majority Vote in Their Favor, but Not a Majority of All the Electors Voting at the Election.

The \$620,000 bond of bonds which the people of New York City, voted to issue at the spring election in April, in order to raise money with which to improve the roads and highways of the town, were to have been delivered to a firm of bankers in Wall street, who contracted to take the entire issue, at 9:30 o'clock yesterday morning. The representative of the bankers was ready to complete the transaction, when a temporary injunction was served upon Joseph Bonnell, Supervisor of Newtown and also a member of the Board of Supervisors of Queens county, restraining him from delivering the bonds or receiving their equivalent in money.

The injunction was granted by Supreme Court Justice Gaynor, in Brooklyn, on Friday night, and came like a thunderbolt to the officials of Newtown, with whom the scheme to improve the roads in and around their town has been a pet project for years, and became possible for the
